1   Testing Analysis

1.1   Approach used

Tetsing analysis was done using JUnit framework, where in green light indication showed the positive results. Each test function depicts the modular level of testing being performed in the source code.

1.2   Results

1. Passed the JUnit Test cases as mentioned in the test class.

2. Individual function based test results show the high testability Quality Attribute.

3. Test results can be linked to specified Requirements.
